

INTERNATIONAL COURSE METABOLIC AND NUTRITIONAL ISSUES IN THE

BRUSSELS, BELGIUM, MAY 28-29

DESCRIPTION | INVITATION LETTER | SCIENTIFIC PROGRAM | INDUSTRY | ACCOMMODATION | FACULTY | CONTACT | REGISTER | PRESENTATION

Metabolic and Nutritional Issues in the ICU - 2019

Dates :

From 28/5/2019 to 29/5/2019

Location :

Erasme University Hospital

Route de Lennik 808

1070 Brussels

Belgium

Several recent, important studies have shaken our understanding of various critical care metabolic response and may influence nutritional management of critically ill patients. We believe a comprehensive update in this field is needed. The goals of this 2-day interactive course include

- to provide an update on the metabolic response to critical illness
- to discuss proven and proposed underlying mechanisms
- to gain insight into the clinical consequences of the metabolic response in terms of outcomes for macro- and micro-nutrients
- to provide an overview of the various clinical concerns and issues related to metabolic therapy
- to present an update on pharmaconutrition
